PAXIS
Hong Kong PrimeAxis Precision Ltd.

HONG KONG PRIMEAXIS PRECISION LTD · Incorporated in Hong Kong · Manufacturing in China since 2007
or@paxis-hk.com · paxis-hk.com

Chinese manufacturing. Western standards.

The cost, capacity and technology of China's best factories, made accessible to Western industry. Every part manufactured to your drawing, inspected, and managed to the standards you work with.

MANUFACTURED TO CUSTOMER DRAWING · AL6061, GOLD ANODIZED

01

Who we are

PAXIS is a Hong Kong company under Western ownership. We manufacture custom parts to customer drawings in our network of vetted partner factories in southern and eastern China, supervised and inspected by our own team in China. Our customers deal with one company, one quotation and one point of responsibility, from the drawing review to the release of the finished order.

02

What we manufacture

Through our network of partner factories we manufacture across the full range of technologies and materials available in Chinese industry. If it can be manufactured in China, we can manufacture it to your drawing. Our main capabilities:

- **CNC machining**: milling, turning and 5-axis machining of metal and plastic parts.
- **Plastic parts and injection molds**: machined, vacuum-cast or injection-molded parts, including the production mold.
- **Jigs and fixtures**: for production, assembly and inspection.
- **Assemblies and kits**: sub-assemblies and kits of matching parts packed as one unit.
- **Sheet metal and laser cutting**: brackets, panels, covers and enclosures, including bending, welding, press-fit hardware and riveting.
- **Custom springs**: produced to your drawing by a specialist spring manufacturer.
- **EVA and custom packaging**: foam inserts, cases and printed boxes.

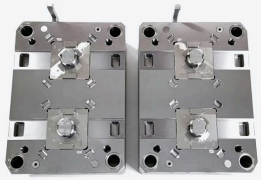

> Quantities range from prototype pieces to tens of thousands of parts in scheduled deliveries.

05

How an order runs

1. **Request for quotation.** You send drawings and specifications by email. We sign your NDA on request.

2. **Drawing review.** Questions are raised and answered before quoting. Any change is approved by you in writing.

3. **Quotation.** We select the qualified partner factory best suited to the part and issue one quotation from PAXIS. Quotations are issued within two to three working days of receiving complete drawings and specifications; complex projects may require additional engineering review.

4. **Order and production.** Production runs to the agreed schedule under the supervision of our team in China.

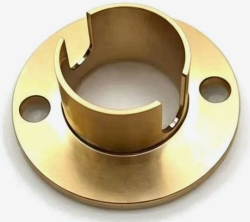

5. **First articles.** Where required, samples are approved before series production.

6. **Quality verification.** The order is released only after our independent verification.

7. **Collection.** Orders are supplied EXW. The goods are ready at the factory, and we help your forwarder arrange collection.

06

Quality in two independent stages

1.

The manufacturer's inspection.

In-process and final inspection to your drawing and inspection requirements, with reports.

2.

PAXIS verification.

Our own team verifies the order at the factory after production, before the goods are released, with photographs before and after packing.

> 100% inspection is available when specified by the customer. Material certificates and reports are supplied where required.

07

How we select partner factories

Factories are qualified after a review of their capabilities, portfolio of past work, production quality and sample parts, a factory visit, and the manufacturer's reputation. We visit our partner factories several times a year. Our team includes native Chinese speakers fluent in English, so technical requirements are communicated precisely.

MANUFACTURED TO CUSTOMER DRAWING · COPPER, PLATED

08

Commercial terms

- One quotation and one contract with PAXIS.
- Payment to PAXIS in US dollars, with no currency conversions and no payments to suppliers in China.
- EXW. We help your forwarder arrange collection.
- Confidentiality: drawings are used only for your order, and we sign your NDA on request.
